

Key investor information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Spiltan Aktiefond Stabil
ISIN code: SE0001015348

Fund management company: Spiltan Fonder AB

Objectives and investment policy

The fund is an actively managed equities fund that invests in stable companies, investment companies, and dividend yield companies in order to generate a stable, positive return over time. The investments break down into ca. 85% in equities and ca. 15% in dividend yield assets. The fund does not invest in companies which operate exclusively in the areas of alcohol, fossil fuels, pornography, gambling, tobacco, or weapons. The management approach is explicitly long-term, resulting in low transaction costs. The fund is completely independent of index weightings.

The fund's assets shall be invested in transferrable securities, money market instruments, fund units, and credit institution accounts. At least 50% of the fund's assets shall, however, be invested in Swedish markets.

The fund's overall objective is, first and foremost, to create a stable, positive return (7% per annum) and, secondly, to outperform the Stockholm Stock Exchange's SIXPRX index.

The fund may, in order to enhance the efficiency of its management, invest in derivative instruments, including OTC derivatives.

The fund does not pay any dividends.

You can normally buy and sell fund units on any banking day.

Recommendation: this fund may be unsuitable for investors who plan to withdraw their money within five years of investing it.

Risk and reward profile

The risk/reward indicator shows the relationship between risk and possible reward when investing in the fund. The indicator is based on the way in which the fund's value has changed over the past five years.

Spiltan Aktiefond Stabil is a category 6 fund, which means a high risk of rises and falls in the value of the fund unit. A category 1 classification does not mean that the fund is risk-free. The fund may, over time, move both to the right and the left on the scale as the indicator is based on historic data which is not a guarantee of future risks/rewards.

The equities market is generally characterised by a high risk, but also by the possibility of a high reward. The indicator primarily reflects

rises and falls in the value of the equities in which the fund has invested.

Risks not shown in the indicator:

A liquidity risk, i.e. the risk that an equity cannot be sold at the designated time without either significantly lowering its price or incurring substantial costs, is not fully reflected in the indicator. The fact that the fund may hold positions in small companies means that the risk level during periods when the market liquidity is limited may be higher than that shown in the indicator. This renders the management of the fund's cash reserves somewhat more critical and means that the fund must, at all times, maintain a suitable portfolio of holdings that enables the liquidity risk to be managed efficiently.

For further information on risks, please see the information brochure available from www.spiltanfonder.se.

Charges

One-off charges taken before or after you invest

Deposit charge	0.00%
Withdrawal charge	0.00%

The above figures represent the maximum amount that may be deducted from your money before it is invested/before the proceeds of your investment are paid out.

Charges taken from the fund during the year

Annual charge	1.52%
---------------	-------

Charges taken from the fund under certain specific conditions

Performance fee	None
-----------------	------

The annual charge constitutes payment for the management of the fund, including marketing and distribution.

The charge reduces the fund's potential return. The annual charge shown refers to the 2021 calendar year and is based on the expenses for that calendar year. The charge may vary slightly from one year to another.

For further information on charges, see § 11 of the fund provisions, which are available from www.spiltanfonder.se

Past performance

The fund's performance (returns) is calculated after deductions for annual charges. The value for each year is calculated in Swedish kronor and with dividends reinvested in the fund.

The fund's basic currency is the Swedish krona.

Past performance is no guarantee of future performance. The fund was launched on 2 December 2002.
