

Key investor information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Spiltan Räntefond Sverige
ISIN code: SE0002152140

Fund management company: Spiltan Fonder AB

Objectives and investment policy

The fund is a short-term fixed income fund, which means that the fund's average fixed interest term and average time to maturity may not exceed 1 year and 2 years, respectively.

Investments are primarily made in interest-bearing securities issued by companies, such as corporate bonds and commercial papers.

The fund's assets may be invested in interest-bearing transferable securities and money market instruments issued in Swedish kronor by the Swedish State, municipalities, county councils, credit institutions, and companies.

The fund's objective is to provide a positive annual return at a low risk.

The fund may, in order to enhance the efficiency of its management, invest in derivative instruments. The fund may not use OTC derivatives.

The fund does not normally pay any dividends.

You can normally buy and sell fund units on any banking day.

Risk and reward profile

The risk/reward indicator shows the relationship between risk and possible reward when investing in the fund. The indicator is based on the way in which the fund's value has changed over the past five years.

Spiltan Räntefond Sverige is a category 2 fund, which means a low risk of rises and falls in the value of the fund unit. A category 1 classification does not mean that the fund is risk-free. The fund may, over time, move both to the right and the left on the scale as the indicator is based on historic data which is not a guarantee of future risks/rewards.

The fund principally invests in interest-bearing securities that are generally characterised by low risk and, hence also a lower risk of losses.

The interest risk, i.e. the risk of interest sensitivity in the fund, is limited by the restriction of the fund's fixed interest term to a maximum of 1 year. The price risk is consequently limited. The indicator primarily reflects rises and falls in the value of the interest-bearing securities in which the fund has invested.

Risks not shown in the indicator:

A liquidity risk, i.e. the risk of difficulty in valuing the security or of trading in the security without either significantly lowering its price or incurring substantial costs, may be higher in corporate bond funds than in equities funds. The corporate bond market has a lower level of transparency and liquidity than, for example, the equities market, which is particularly true in conjunction with market turbulence or any credit events. The liquidity may vary in line with changes in supply and demand. If the market liquidity is limited, large withdrawals from the fund may necessitate the sale of holdings at disadvantageous prices and, if market conditions are particularly stressed, it may be necessary to postpone trading in the fund for a period of time which will mean that during this period you, as the unit holder, will be unable to complete your redemption order in the normal processing time. This renders the management of the fund's cash reserves somewhat more critical and means that the fund must, at all times, maintain a suitable portfolio of holdings.

A credit risk, i.e. the risk that an issuer or counterparty may suspend payments or that its creditworthiness may deteriorate, which would have a negative effect on the value of the security.

Charges

One-off charges taken before or after you invest

Deposit charge	0.00%
Withdrawal charge	0.00%

The above figures represent the maximum amount that may be deducted from your money before it is invested/before the proceeds of your investment are paid out.

Charges taken from the fund during the year

Annual charge	0.10%
---------------	-------

Charges taken from the fund under certain specific conditions

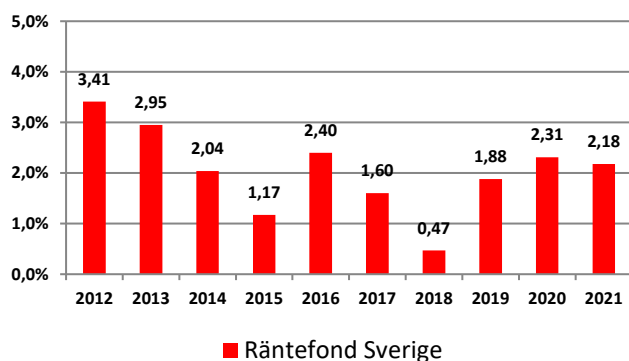

Performance fee	None
-----------------	------

The annual charge constitutes payment for the management of the fund, including marketing and distribution.

The charge reduces the fund's potential return. The annual charge shown refers to the 2021 calendar year and is based on the expenses for that calendar year. The charge may vary slightly from one year to another.

For further information on charges, see § 11 of the fund provisions, which are available from www.spiltanfonder.se.

Past performance

The fund's performance (returns) is calculated after deductions for annual charges. The value for each year is calculated in Swedish kronor and with dividends reinvested in the fund.

The fund's basic currency is the Swedish krona.

Past performance is no guarantee of future performance. The fund was launched on 17 September 2007.
