What is this product?

Type UCITS fund

Term The fund has no maturity date. The fund company has the right to close the fund and redeem the units, see information in the prospectus.

Objectives The fund is an actively managed equities fund in which investments are made irrespective of the size of companies or sector. The objective is for at least half of the fund's assets to be invested in companies with registered offices or permanent establishments in the Swedish province of Småland, with the aim of promoting corporate capitalisation and development in the Småland region. Great emphasis is placed on the analysis and evaluation of the individual company's business concept, company management team, and long-term prospects. The fund is completely independent of index weightings. At least 90% of the fund's assets shall be invested in transferrable securities issued by issuers with registered offices in Sweden. A minimum of 40% of the fund's assets shall, furthermore, be invested in companies with registered offices or permanent establishments in Småland. The overall objective of the fund is to achieve a growth in value which, over time, exceeds the equivalent for the Stockholm Stock Exchange's SIXPRX index. The fund may not invest in derivative instruments, including OTC derivatives. The fund does not normally pay any dividends.

Intended Investor This fund may be suitable for those who plan to hold their investment for at least 5 years and who understand that the money invested in the fund may increase or decrease in value and that there is no guarantee that you will get back all the capital invested. To invest in the fund, you do not need to have any particular prior knowledge or experience of funds or financial markets.

Depository Depository: Swedbank AB (publ). The annual reports, semi-annual reports, prospectus, the latest prices of units, and other practical information may be obtained free of charge in Swedish, from www.spiltanfonder.se.

What are the risks and what could I get in return?

The risk indicator assumes that you keep the product for 5 years.

The summary risk indicator provides an indication of the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets. We have classified this product as 5 out of 7, which is a medium-high risk class. An example explanation: This rates the potential losses from future performance at a medium-high level, and poor market conditions will likely impact the fund management company's capacity to pay you.

This product does not include any protection from future market performance. You could, therefore, lose all or part of your investment.

The actual risk can vary substantially if you exit the investment in advance and may result in you receiving smaller returns. You may not be able/permitted to exit the investment in advance. You may incur substantial extra costs for an early exit.

Counterparty risk arises if a counterparty does not fulfill its obligations to the fund, for example by not paying a set amount or not delivering securities as agreed.

Operational risk is the risk of loss due to, for example, system failure, errors caused by the human factor or by external events.

Your returns from this product depend on future market results. Market developments in the future are uncertain and cannot be accurately predicted. The figures shown include all the costs of the product itself, but may not include all of the costs you pay to your advisor or distributor/and the costs of your advisor or distributor. The figures do not consider your personal tax situation, which may also affect how much you get back. The unfavourable, moderate, and favourable scenarios show the worst, average, and best performance for the product over the last 10 years. The scenarios shown are based on previous results and certain assumptions. Markets could develop very differently in the future. The stress scenario shows what you could get back during extreme market conditions. Performance scenarios are shown for 1 year and the recommended holding period. These types of scenarios occurred for an investment between 2012-2022.

What happens if Spiltan Fonder AB is unable to pay out?

The fund's assets may not, by law, be held with the fund management company. The law requires, instead, that every fund has a separate company, a depositary, that holds the fund's assets. If the fund management company were to default, the depositary will take over management of the fund. There is no other form of compensation or guarantee scheme for investors in the fund.

What are the costs?

The person advising you on or selling you the product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment. If the fund is part of another product, e.g. unit-linked insurance, there may be other costs for that product.

What are the costs?

The tables show the amounts taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product, and how well the product performs. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the recommended holding period/ other holding periods, we have assumed the product performs as shown in the Moderate scenario.
- 100,000 SEK is invested.

	If you redeem after 1 year	If you redeem after 5 years (Recommended Holding Period)
Total costs	1 600 SEK	16 580 SEK
Annual cost impact*	1.6 %	1.6 %

*This illustrates how costs reduce your return each year over the holding period. It shows, for example, that if you exit at the recommended holding period, the average return per year is projected to be 20.9% before costs and 19.3% after costs. We may share part of the costs you pay us with the person selling you the product to cover the services they provide. You will be informed of the amount.

Composition of costs (The amounts in SEK are based on an investment of 100,000 SEK)

Performance-related fees	No performance related fee is charged for this product	Not applicable

How long should I hold it and can I take money out early?

Recommended Holding Period (years) 5 years

The fund has no minimum holding period requirement but, since it invests in equities, it is suitable for a medium to long investment horizon. You should be prepared to save in the fund for at least 5 years. You normally have the option to sell your fund on any and all business days without any additional fee.

How can I complain?

If you have any complaints about the fund, you can contact the person who advised you or sold you the product.
